

Beyond the Third Year...

Doing Maths & Stats and looking for a career in research, business, industry etc?

Options to consider:

- **Master of Science - Mathematics and Statistics**: a pathway into a research career (including PhD), or a stepping stone prior to starting in industry. A 2 year (full-time) program: coursework 150p, research project 50p.
- **Master of Operations Research and Management Science**: combines general concepts from management, business practice and business communication with analytical skills. A 2 year (full-time) coursework only program: discipline subjects 125p, professional skills 75p.
- **Postgraduate Diploma in Science - Maths & Stats**: A 1 year (full time) coursework only program: discipline subjects 100p (of which up to 50 can be at 3rd year level). Can lead to MSc.
- **Honours**: available only to graduating UofM students who started prior to 2008.

All programs are available part-time. For more information, visit <http://www.ms.unimelb.edu.au/> → Prospective Students → Choose what you want

NB: Be aware that your marks for third year subjects will be considered for entry into the above options.
